

ABOUT US

Medtronic's Spinal and Biologics Business Information

Medtronic's Spinal and Biologics business, based in Memphis, Tenn., is the global leader in today's spine market and is committed to advancing the treatment of spinal conditions. Medtronic collaborates with world-renowned surgeons, researchers and innovative partners to offer state-of-the-art therapies for spinal, neurological, orthopaedic and oral maxillofacial conditions.

Medtronic is dedicated to finding solutions to clinical challenges by focusing our energies, talents and resources on delivering state-of-the-art products and services for our surgeon customers and their patients. Medtronic's Spinal and Biologics business has the capabilities to meet the needs of spinal surgeons worldwide with more than 2,500 employees at facilities in Bartlett and Memphis, Tennessee; Warsaw, Indiana; and Deggendorf, Germany.

Medtronic offers a diverse range of spinal and biologic therapies, giving surgeons quality and flexibility in treating their patients' spinal conditions. Combined with the expertise of Medtronic's Surgical Navigation Technologies business, Medtronic's Spinal and Biologics business provides a range of capabilities for neurological and spinal therapies unmatched in the industry.

Today's shifting demographics are creating an array of new surgical needs. With the advent of new technologies, such as minimally invasive surgical procedures and Biologics, Medtronic is fulfilling our promise of investing in the future.

Medtronic's Spinal and Biologics business is committed to developing new products and services that take quality and cost effectiveness of patient care to an even higher level than before. Numerous clinical trials provide the scientific evidence that ensures patients, surgeons and medical facilities are getting the best products for spinal surgery on the market.

These products and services span all Medtronic's strategic areas: physician services, medical education, surgical products, Minimal Access Spinal Technologies, Biologics and the aging spine.

More information about the company and its spinal therapies can be found at www.medtronicspinal.com and its patient-education Web sites, www.back.com, www.iscoliosis.com, www.maturespine.com and www.necksurgery.com.
